

Attention! Attention! Attention!

Feel sick, got a fever? Then turn around and go home. We want to keep our friends healthy and we need your help to do that.

This Facility practices social distancing, so please make sure you are behaving yourself and extending your neighbor six feet.

If you feel you can not maintain six feet please feel free to mask up. If you just want to mask up, because you want to hide your facial expressions, or you love your stylish mask then feel free.

Dear Parents,

Going forward we will ask that:

- If anyone in your family or your child is ill please keep your child home.
- Only one person brings your child to class, drop your child right at the door, so that we can minimize the number of people gathering at one time.
- Your child washes their hands with soap and water for 20 seconds when arriving, before leaving, after coughing or sneezing, and using restroom.
- We are not requiring your child to wear a mask.
- Staff will wear masks
- Hand sanitizer will be available
- There will be a bottle of disinfectant that you may use to clean hooks, table or chairs before sitting if you choose. This cleaner is proven to kill viruses similar to the COVID-19 on hard non-porous surfaces (simple green d pro 3 plus). This is the cleaner we use on a regular basis to clean all of our matting and floors weekly.
- Social distancing will be maintained.
- We will also do our best to not high five or hug kids but will switch to elbow bumps.

Amy Mathisen, Owner
